

Attendees

- Anandan, Taksh, Sonic & Vidish Mehta

Thank you all for attending.

Action Items & Deadlines

- Front-end System Update (Anandan, Taksh, Sonic, Vidish)
 - o Angular JS app
 - App component needs to be created using the form-module in node modules
 - Functional HTTP calls to backend Django to be completed
 - Deadline: 09/04/2020
- Backend Algorithm Updates (Vidish)
 - o Django API created with existing sql db attached to it.
 - Complete integration of the api to the backend development code.
 - o Pivot to Hotel and tourism industry
 - Hotel API to be tested before pivoting. Will inform Sonic once API has tested.
 - o Core Backend algorithm
 - Smaller enhancement such as incorporating GA to grid the surface to be completed.
 - o Configure a rabbit mq server as broker to connect to backend systems for celery asynchronous task processing.
 - o Deadline:
 - 08/04/2020 → API integration
 - 12/04/2020 → VM celery with rabbit mq server deployment
- Without the internet
 - o Google API will breakdown
 - Connect to a local database with most popular locations already stored.
 - If location does not exists, provide a simple error handling.
 - o Deadline
 - 14/04/2020 → post deployment of the whole project.

Meeting & Discussions

- Let's have a meeting on 09/04/2020 9:00 pm to provide status update on front-end and backend systems and work on their integration.
- Let's go through a rough round on the presentation [draft 1].
